

DBW-001 CONSUMER CONTACT AUTHORIZATION

PUBLIC REDACTED EDITION

DOCUMENT NUMBER	DBW-001
REVISION	4
ISSUE DATE	14 FEBRUARY 2026
SUPERSEDES	Revision 3 (withdrawn)
CLASSIFICATION	Public — Redacted
ISSUING DIVISION	Compliance
REVIEW CYCLE	Annual, or upon incident
NEXT REVIEW	Not scheduled

1. PURPOSE

This document records the conditions under which Beanwater Labs authorizes contact between members of the public and Drop 01 product containers. It establishes the scope of that authorization, the certification position applied to it, and the limitations that remain in force. It does not constitute an offer of sale, a distribution agreement, or a guarantee of availability.

This revision consolidates prior guidance. Where this document conflicts with prior guidance, this document is controlling. Where prior guidance cannot be located, no conflict is recorded.

2. PRODUCT SCOPE

The following containers fall within the scope of this authorization.

CODE	VARIANT	STATUS
DBW-001-BB	Black Bean	Consumer contact authorized
DBW-001-PT	Pinto	Distribution not confirmed
DBW-001-GZ	Garbanzo	Authorized without objection
DBW-001-LM	Lima	Active
DBW-001-RB	Red Bean	Within current guidance
DBW-001-■■■	■■■■■	Not cleared for anything

The sixth entry is retained for continuity of numbering. No further detail is released in this edition.

3. CONSUMER CONTACT PARAMETERS

Contact is authorized under the following parameters. Parameters are not ranked and no parameter takes precedence over another.

CONTAINER VOLUME	473 mL (16 fl oz)
PERMITTED HANDLING	Manual
RECOMMENDED USE	Variant specific. See Section 2.
FOR HUMANS?	See variant record
SUPERVISION REQUIRED	No

SUPERVISION AVAILABLE No

RETURN PATH Not established

Where a variant record answers the FOR HUMANS? parameter with a value other than AUTHORIZED, that value is the operative answer. Compliance has reviewed the remaining values and has not requested changes.

4. CERTIFICATION POSITION

All containers within scope carry Certified Wet™ status. Certification is issued internally by Beanwater Labs. Every batch is reviewed by no independent body, assessed by no regulatory authority, and approved by Beanwater Labs alone.

CERTIFICATION BODY Self

REVIEW STATUS Complete

INDEPENDENT OVERSIGHT Not requested

METHODOLOGY REFERENCE Beanwater Labs, Classification Standards

SCALE 0–100. Certified Wet™ awarded at 60–79.

This certification means something. Beanwater Labs is not prepared to say what.

5. DISTRIBUTION LIMITATIONS

Product is not sold in stores. No authorized retailer exists. Access points listed in public materials are observational records and do not represent points of sale, and their presence in a record does not indicate that product is available at that location.

REFERENCE	LOCATION	DISTRIBUTION STATUS
AP-01	Milwaukee, WI	Denied
AP-02	Gary, IN	Unverified
AP-03	Parking Lot C	Probable
AP-04	■■■■■■■■	Active
AP-05	International Waters	Jurisdiction unclear
AP-06	Former access point	Still reporting

AP-06 was decommissioned. Transmissions continue on the original schedule. The matter is not open.

6. INCIDENT REPORTING

Anomalies encountered during authorized contact should be reported through the public transmission form. Reports are received. Response is not promised.

Reporting parties are asked not to include the incident number in their report, as incident numbers are assigned after review and a report containing one cannot be processed.

7. LEGAL CLASSIFICATION

Products exist in legal quantum superposition: as-in, either, both or neither.

No clarification is currently binding. This section has been reviewed by Legal and returned without comment. The absence of comment has been recorded as agreement.

REVISION HISTORY

REV	DATE	CHANGE
1	03 MAR 2024	Initial issue.
2	19 AUG 2024	Section 5 amended. The amendment is not described.
3	07 JAN 2025	Withdrawn. Reason not recorded.
4	14 FEB 2026	Reinstates Revision 2. Revision 3 remains withdrawn and remains in circulation.

Holders of Revision 3 are not required to take action. Holders of Revision 3 have not been identified.
